HOW TO USE i2P EDUCATIONAL RESOURCES IN YOUR CLASSROOM!

inspire

empower

There are several aspects of the I2P Expeditions that work great in the classroom. The expeditions are **interactive**, are set in **exotic places**, and are **real life challenges** with **real people**. We have found that the students find following the expeditions and working on the curriculum very interesting for three key reasons: the class activities are creative, the students have choices as to what they will learn about, and they are able to make personal connections with the Youth Ambassadors.

All of our Experiential Learning Programs are developed by leading Educators from around the globe, in conjunction with the incredible support of Simon Fraser University and Transamerica.

Best of all, the i2P Education Program is **100% FREE** and appropriate for all levels of classroom. In addition, the i2P Educational Program and Online Resources are very flexible and have been developed to allow for varying levels of participation. Get involved and try it out today!

Sincerely,
i2P's Participating & Aspiring Educators

CLASS TIME COMMITMENT LEVELS

Depending on the time you have with the students as well as how much time you want to spend on the I2P curriculum, there are several possibilities that can all be effective. The following are examples of how the curriculum can be leveraged in your classes:

LEVEL 1

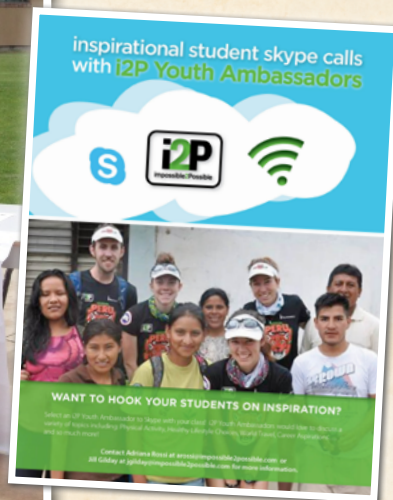

- Class follows the live feeds
- Class does a financial literacy activity together
- Students choose an assignment from the curriculum and present accordingly

LEVEL 2

- Teacher emails Youth Ambassadors with some student questions prior to expedition
- Class follows the live feeds
- Class follows some/all of the financial literacy curriculum activities
- Students choose an assignment from the curriculum and present accordingly

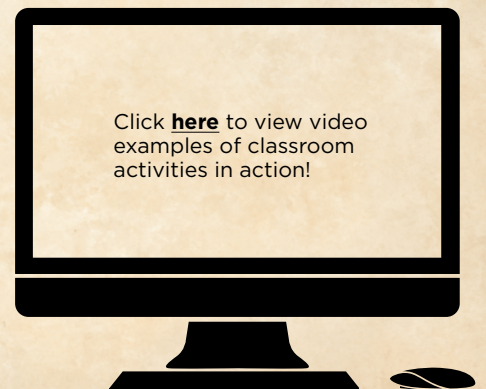

LEVEL 3

- Teacher contacts the Youth Ambassadors prior to expedition to set up live in-class Skype calls. Students prepare questions for the calls.
- Class does pre-expedition activities in class (view videos on web site)
- Class follows the live feeds
- Class follows all of the financial literacy curriculum activities
- Students choose an assignment from the curriculum and present accordingly
- Students re-connect with one, several, or all Youth Ambassadors with follow-up questions
- A thematic art project is included within the unit
- Class invites other classes in the school to participate in the i2P Run Challenge program

CONTACT MATT HOWE TO LEARN HOW YOU CAN SKYPE WITH YOUTH AMBASSADOR ALUMNI OR LAUNCH A RUN CHALLENGE AT YOUR SCHOOL. IT'S OPEN TO **EVERYONE**. AND IT'S **FREE**!

PROVEN RESULTS. MEASURABLE CLASSROOM IMPACT!

“

“As a teacher, i2P motivates me to be creative with my teaching by seeing what other great teachers are doing with the i2P curriculum. It is interactive, extreme, real and students love it! There is do much you can do with it.”

“My classrooms utilize a project-based/inquiry model, and the interactivity and uniqueness of i2P’s Expedition Programs fit amazingly well into our lessons.”

“i2P provides authentic collaboration experiences that enable my students to make connections globally, and yet act locally.”

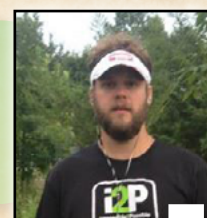

“Promoting lifelong fitness is a constant goal for my students, and i2P adds purpose and relevance to our classroom P.E. activities.”

“The impossible2Possible curriculum involves students in a unique adventure, all while helping them learn in a fun and interactive way. I cannot wait to incorporate the program into my future classroom!”

“My classes and I just got a recent visit from Valérie, one of the ambassadors. We are all pumped up and excited about following her and the rest of the team in the Atacama desert, especially because it's a first for all of us. I even laced up my good old running shoes and got moving again. This vibe is seriously contagious!”

“As a tech-savvy educator, I have seen the many benefits i2P has brought to our school through contagious motivation and positive influences. If you and your students have not participated in one of the expeditions, now is the time to make a lasting impression. You may never know the potential of some of your students unless you push them out of their comfort zones.”
